67 TOP MONEY- SAVING PRODUCTS

Save money on utility bills, time, maintenance, and employee efficiency

Looking to squeeze more money out of your budget? These economical products are geared toward energy-slashing results, fast ROIs, low initial and life-cycle costs, and minimal environmental impact. The *BUILDINGS* editorial staff is serving up budget-friendly solutions that benefit your bottom line in the following categories:

	Energy Measures	Reduce your utility bills
	Retrofit Friendly	Reuse existing structures
	HVAC Fixes	Strengthen your systems
	Labor Reducing	Minimize time and labor
	Water Saving	Lower your water consumption
	Occupant Wellbeing	Improve employee productivity
	Lighting Solutions	Turn down energy usage
	Software & Programs	Manage results from your computer

ENERGY MEASURES

▶▶ The Tambient Control Hub (TCH) meets ongoing energy mandates without compromising worker productivity. The

TCH is a **programmable lighting control device** that uses external daylight and motion sensors to automatically adjust luminance levels in response to changes in natural daylight. It also shuts down lights when occupants walk away from their stations and can be manually adjusted to dim if needed. Placing

these control hubs in areas with daylight can drastically reduce power consumption.
